PROJECT API DOCUMENTATION

BASE URL: http://localhost:4000/api

PRODUCT MODULE

1) CREATE PRODUCT

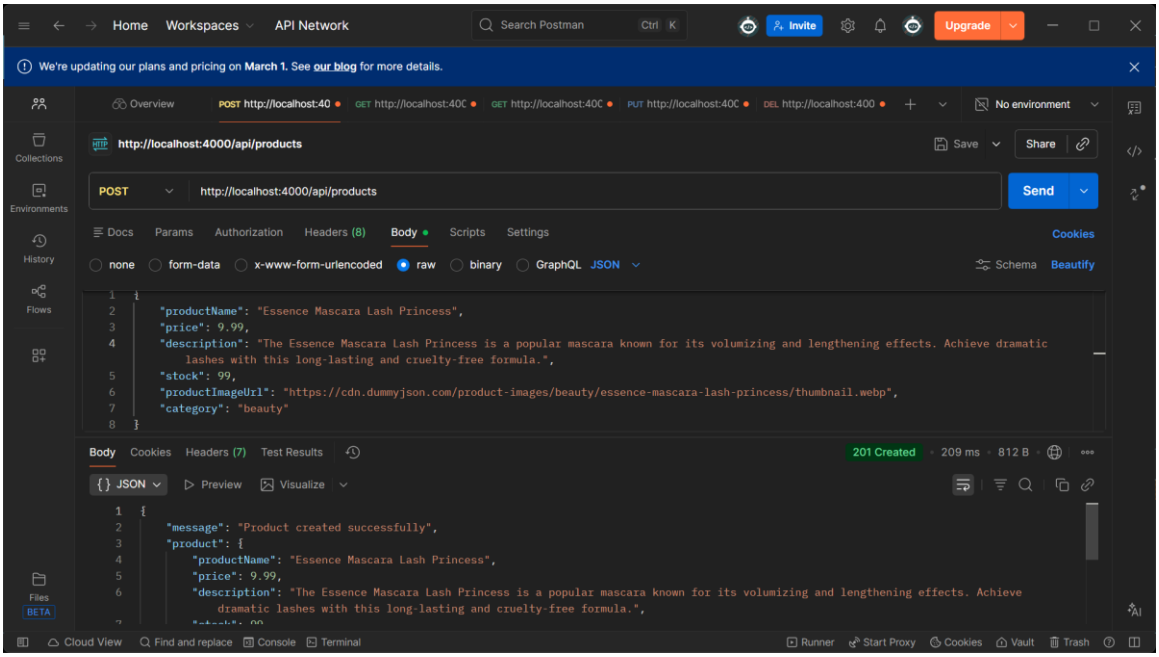
Method: POST

Endpoint: /api/products

Token Required: NO

Explanation: Enter product details in Postman Body (raw → JSON) and send request. This API stores the product in the MongoDB database.

Status Code: 201 Created.



2) GET ALL PRODUCTS

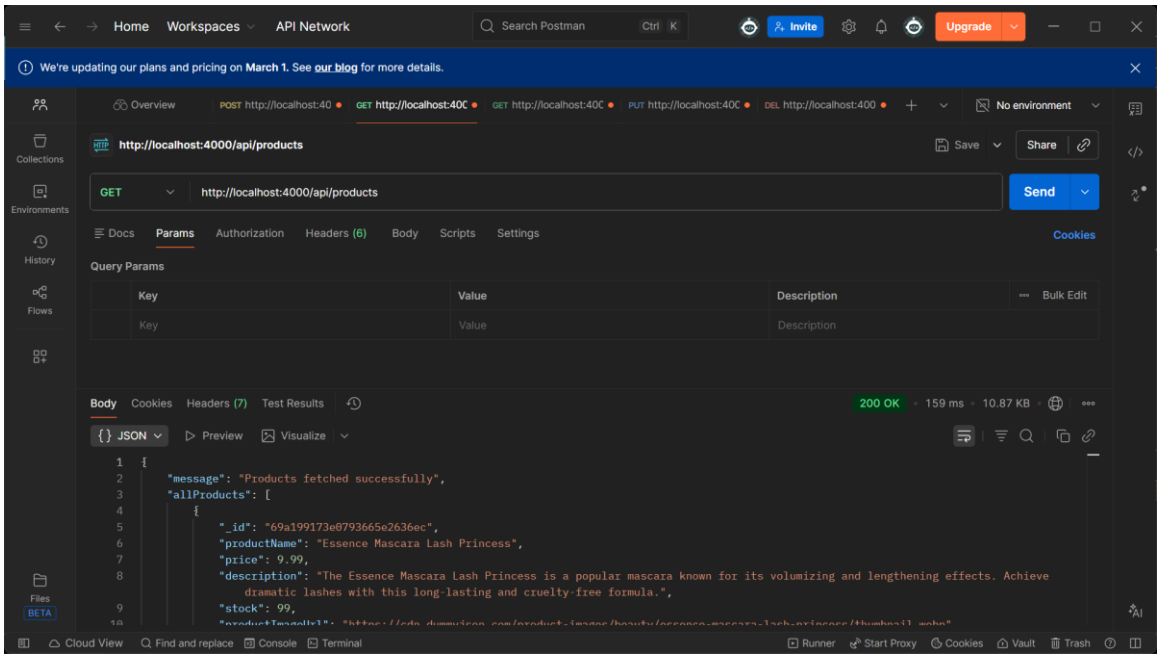
Method: GET

Endpoint: /api/products

Token Required: NO

Explanation: This API fetches all products stored in the MongoDB database. It returns the list of products in JSON format.

Status Code: 200 OK



3) GET PRODUCT BY ID

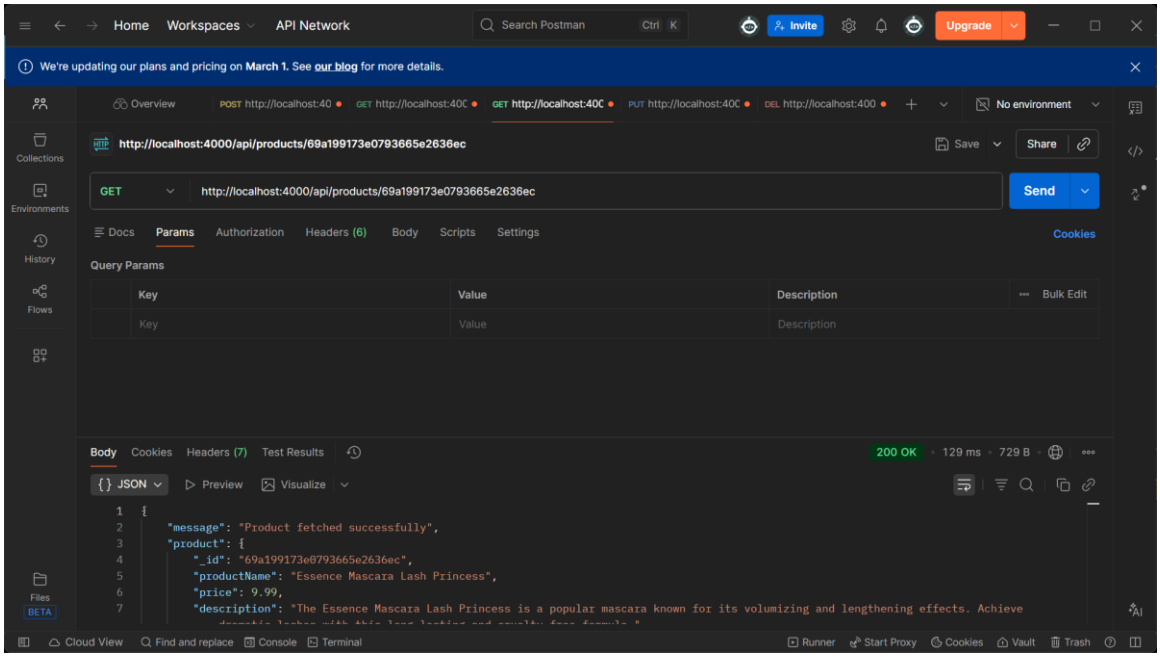
Method: GET

Endpoint: /api/products/:id

Token Required: NO

Explanation: This API fetches a single product using its MongoDB _id. It returns the selected product in JSON format.

Status Code: 200 OK



4) UPDATE PRODUCT

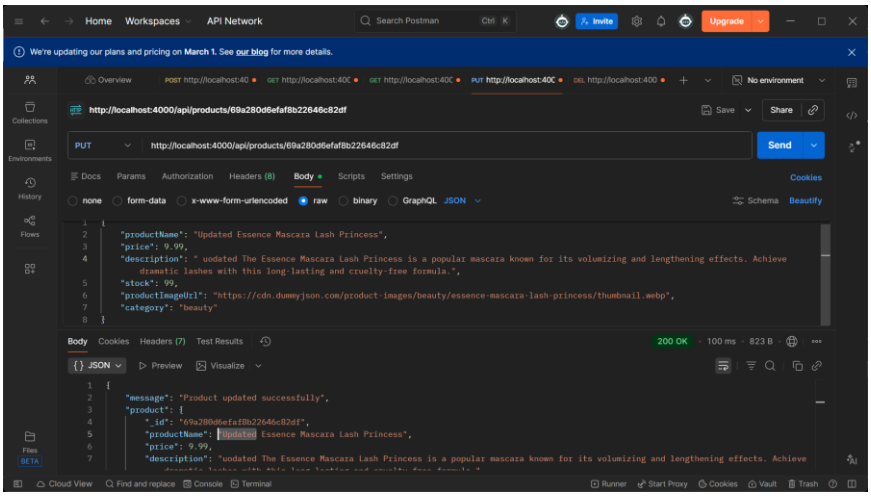
Method: PUT

Endpoint: /api/products/:id

Token Required: NO

Explanation: Enter updated product details in Postman Body. This API updates the selected product in MongoDB.

Status Code: 200 OK



5) DELETE PRODUCT

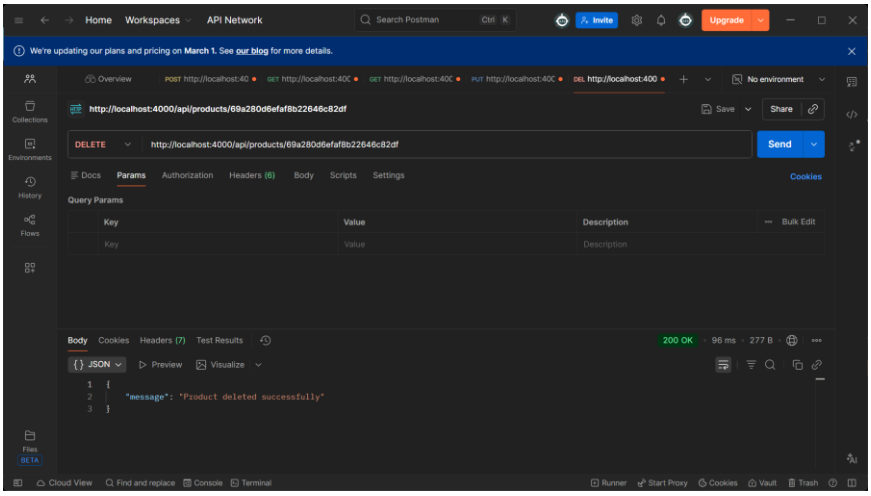
Method: DELETE

Endpoint: /api/products/:id

Token Required: NO

Explanation: This API deletes the selected product from MongoDB database.

Status Code: 200 OK



AUTH MODULE

6) REGISTER USER

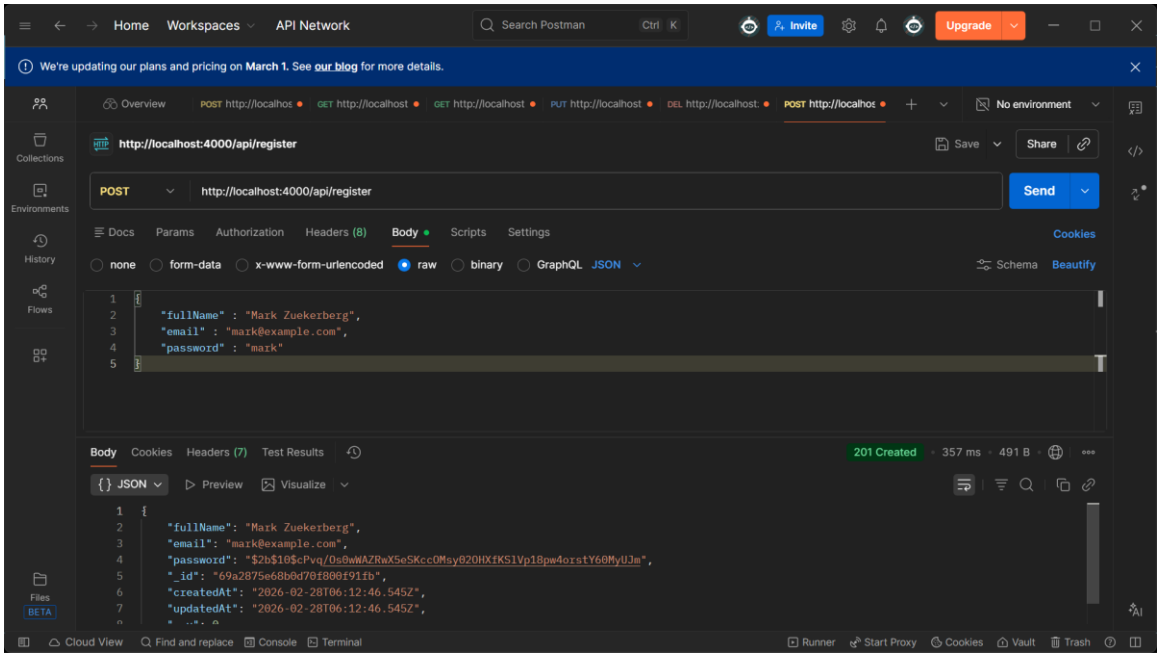
Method: POST

Endpoint: /api/register

Token Required: NO

Explanation: Enter user details in Postman Body. This API creates a new user. Password is hashed before storing in database.

Status Code: 201 Created



7) LOGIN USER

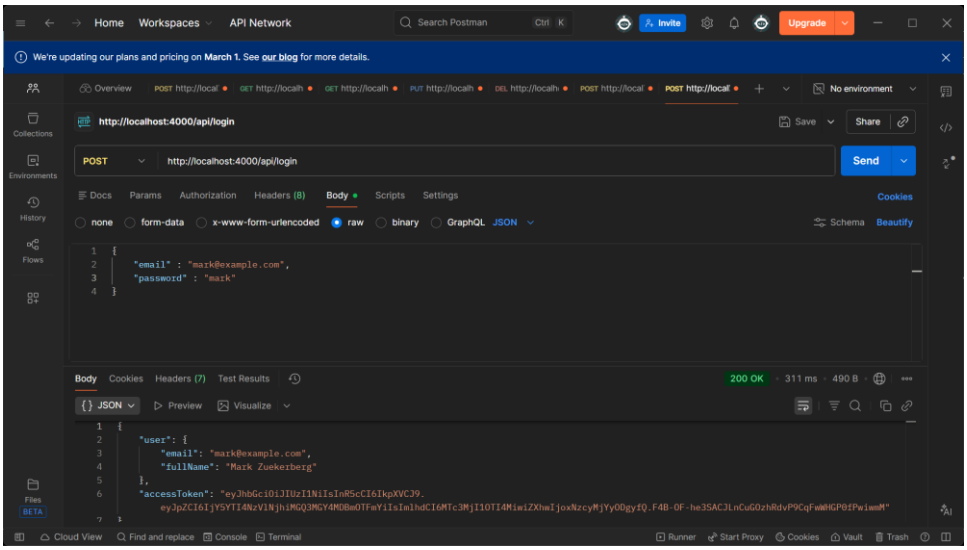
Method: POST

Endpoint: /api/login

Token Required: NO

Explanation: Enter email and password. If credentials are correct, this API returns a JWT access token.

Status Code: 200 OK



CART MODULE

Note: All cart APIs require JWT token in Authorization header.

Format: Bearer <accessToken>

8) ADD TO CART

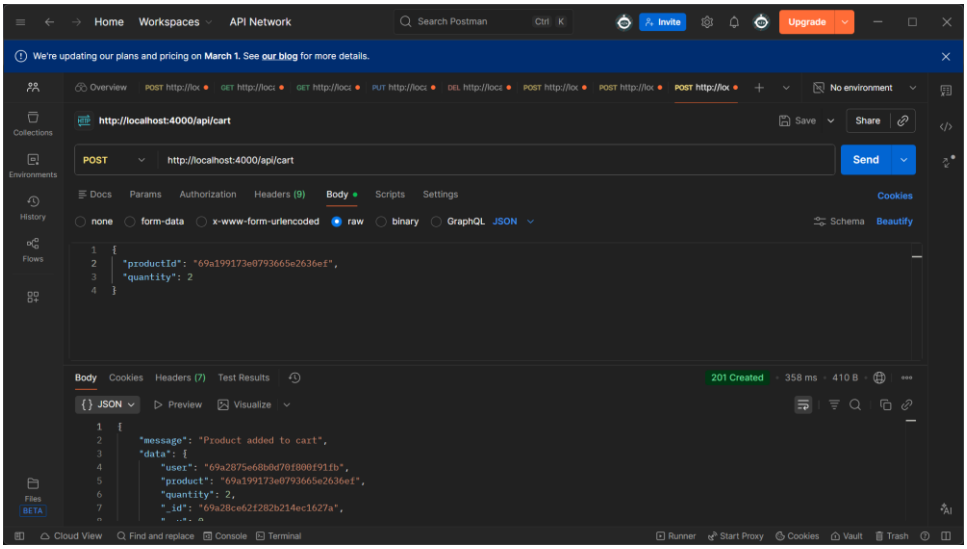
Method: POST

Endpoint: /api/cart

Token Required: YES

Explanation: Enter productId and quantity in Postman Body. This API adds the selected product to the logged-in user's cart.

Status Code: 201 Created



9) GET CART ITEMS

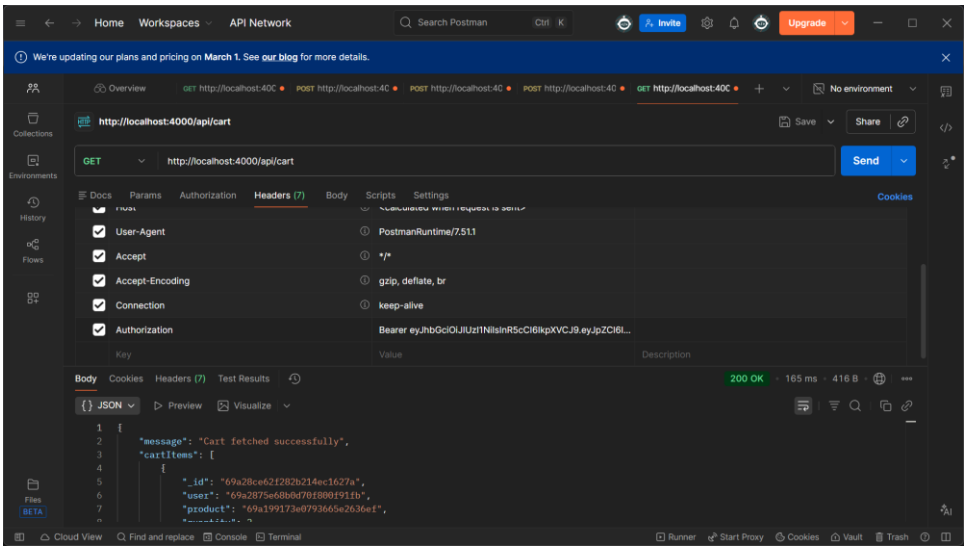
Method: GET

Endpoint: /api/cart

Token Required: YES

Explanation: This API fetches all cart items of the logged-in user.

Status Code: 200 OK



10) UPDATE CART ITEM

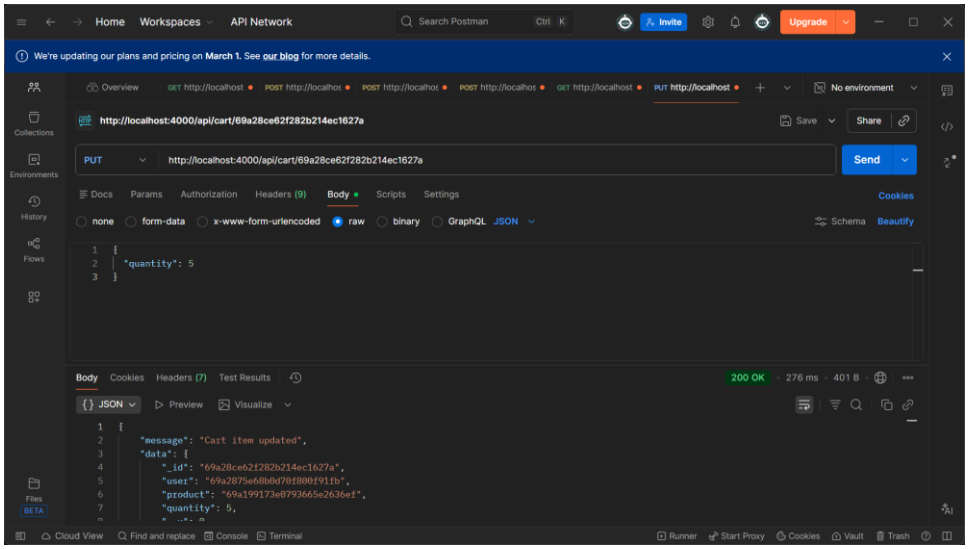
Method: PUT

Endpoint: /api/cart/:id

Token Required: YES

Explanation: Enter updated quantity in Postman Body. This API updates cart item quantity.

Status Code: 200 OK



11) DELETE CART ITEM

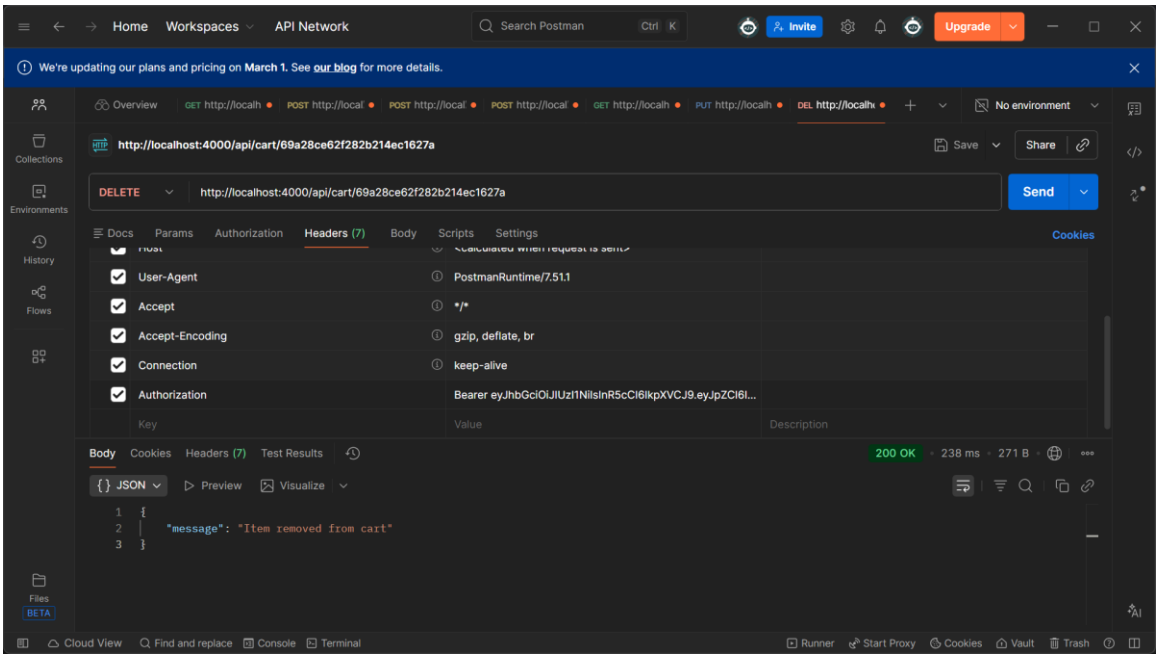
Method: DELETE

Endpoint: /api/cart/:id

Token Required: YES

Explanation: This API removes the selected item from the user's cart.

Status Code: 200 OK



MONGODB ATLAS

Explanation: MongoDB Atlas is used as a cloud database. All products, users, and cart data are stored in collections:

- products

- users

- carts
